let freedom swing

JAZZ AND DEMOCRACY • JAZZ AND THE CIVIL RIGHTS ERA
JAZZ AND THE HARLEM RENAISSANCE
Jazz for Young People® on Tour is generously supported by Jody and John Arnhold, Valerie S. Brown, Gail and Al Engelberg, Jennifer and Greg Geiling, Susan and J. Alan Kahn, the Arthur Levine Foundation, Jennifer and Michael Price, the Laurie M. Tisch Illumination Fund and the New York City Department of Cultural Affairs.

Photographs courtesy of the Frank Driggs collection, with the exception of pages 3, 4, 8, and 9 by Frank Stewart, and page 7, 15 and 20, Library of Congress, Prints & Photographs Division.

Resource Guide prepared by Justin Poindexter, Manager of Educational and Community Programs, Jazz at Lincoln Center.
Jazz for Young People on Tour (JFYP on Tour) brings outstanding jazz artists and performances to school audiences. Based on the Wynton Marsalis and Sandra Day O’Connor Let Freedom Swing: Conversations on Jazz and Democracy curriculum, JFYP on Tour includes three in-school jazz concerts throughout the year: Jazz and Democracy, Jazz and the Civil Rights Era, and Jazz and the Harlem Renaissance.

THE RESOURCE GUIDE

The purpose of this guide is to provide educators with contextual information around the concerts. We have included big ideas around democracy and American history, jazz history and vocabulary, and key cultural figures. Also included is a list of audio, video, and online resources that instructors may find useful for their own preparation or for use in conjunction with the materials and suggested activities.

PDF of Resource Guide and additional resources may be found at jalc.org/jfypschools
WHAT INSTRUMENTS WILL YOU SEE?

Jazz can be played on any instrument, but here are brief descriptions of the most common instruments that make up a jazz ensemble and the roles they play.

The **vocalist** (top left) uses their voice as an instrument. Jazz vocalists can sing lyrics to songs as well as improvise solos just like a saxophone or trombone. Jazz vocalists can also scat-sing, a technique that uses nonsense syllables to improvise on the melody.

The **trumpet** (top right) is a member of the brass family. Made out of metal, brass instruments can create a range of colors and textures and are capable of making a very powerful sound. Trumpet players can play melodies and produce a range of sounds using mutes and vocal effects. They can shout, squeal, honk, growl, whisper and sing.

The **trombone** (bottom left) is also a member of the brass family. Lower in pitch than a trumpet, the trombone uses a slide to change notes. They can also play melodies and produce a range of sounds using mutes and vocal effects.
The saxophone (middle left) is a member of the woodwind family. Most woodwind instruments, with the exception of the clarinet, are also made of metal. Their warm tone (and their name) comes from the wooden reeds responsible for their sound.

The drums (top left) keep time for the band, creating and maintaining the groove with the bass player. The drummer can also interact with the rest of the band, “talking” to the other musicians by playing accents in response to the music.

The bass (bottom right) player works very closely with the drummer to keep the groove together. They must listen closely to each other at all times, coordinating the rhythm of the bass with the swing pattern played on the ride cymbal. The bass player also outlines the harmonies of the music.

The pianist (top right) and guitarist (bottom left) support the harmonies and rhythms of the music. Unlike the bass player, who usually plays just one note at a time, pianists and guitarists can play many notes at once. They create rich combinations of notes (or chords) that support the melody and the soloist. Like the drums, they can also comment on the music with rhythmic accents.
Jazz calls us to engage with our national identity. It gives expression to the beauty of democracy and of personal freedom and of choosing to embrace the humanity of all types of people. It really is what American democracy is supposed to be.

WYNTON MARSALIS

If the freedom of speech is taken away then dumb and silent we may be led, like sheep to the slaughter.

GEORGE WASHINGTON
BIG IDEAS IN JAZZ AND DEMOCRACY for Classroom Exploration

DEMOCRACY • a system in which everyone can vote and share in making decisions.

CITIZEN • a member of a community, having rights, privileges as well as obligations.

FREEDOM • the right to do what you want, to make your own decisions, and express your own opinions.

BLUES • an African American music developed in the South during the mid-1800s. It is the foundation of most American popular music. The blues is capable of expressing a wide range of emotions, often including sadness or loss.

IMPROVISATION • the act of making something up on the spur of the moment.

SWING • the basic rhythmic attitude of jazz. When a whole band is swinging it means everyone is listening to and balancing with one another while still expressing their unique personalities. Swing also refers to a specific style of jazz for dancing featuring large ensembles.

JAZZ AND DEMOCRACY PLAYLIST
(notable renditions in italics, most selections available on itunes)

It Don’t Mean a Thing if it Ain’t Got That Swing – Duke Ellington
Things Ain’t What They Used To Be – Duke Ellington
My Bucket’s Got a Hole in it – Louis Armstrong
Struttin’ with Some Barbecue – Louis Armstrong
When the Saints Go Marching In – Louis Armstrong
Royal Garden Blues – Sidney Bechet / Louis Armstrong / Bix Beiderbecke
They Can’t Take That Away From Me – Louis Armstrong and Ella Fitzgerald
Stompin’ at the Savoy – Chick Webb / Louis Armstrong and Ella Fitzgerald
How High the Moon – Ella Fitzgerald
A Tisket, A Tasket – Chick Webb featuring Ella Fitzgerald
Fine and Mellow – Billie Holiday
Well You Needn’t – Thelonious Monk
Lester Leaps In – Count Basie with Lester Young
Jumpin’ at the Woodside – Count Basie
Every Day I Have the Blues – Count Basie featuring Joe Williams
Sing, Sing, Sing – Benny Goodman
A Night in Tunisia – Dizzy Gillespie
Now’s the Time – Charlie Parker
American democracy was designed from the very beginning around the idea of personal freedom. These key phrases from early American history—“We the People,” “E Pluribus Unum” and “A More Perfect Union”—have served as important themes for our nation since its founding.

“We the People” are the first three words of the United States Constitution and highlight the truly revolutionary nature of the American historical enterprise in placing unprecedented faith in the ability of its citizens to establish a republic.

“We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defense, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.”

“E Pluribus Unum” (Latin for “Out of Many, One,) was inscribed in 1776 on the face of the Seal of the United States. Long considered the official motto of the United States, “E Pluribus Unum” was as important in the 18th century as it is today in establishing an ideal for the nation—that many, different peoples could come together to form one society.

“A More Perfect Union” is a phrase that appears in the first section of the U.S. Constitution. This idea captures the aspirations of the early republic to continue to improve over time, a difficult and challenging project, both then and now.

These ideas are relevant to the world of jazz as well: a group of diverse musicians negotiating in time to create a collective expression that reflects the unique personalities and values of each individual for the good of everyone. The traditions of experimentation and improvisation in jazz resemble the innovative approach of America’s democracy in placing so much faith in its people and in striving to invent something new, different, and perhaps, even better.
WHAT IS JAZZ?

Jazz grew out of the African-American community in turn of the 20th century New Orleans. It is a mingling of the musical expressions of all the people who came to the United States by choice or by force – people from Africa, Europe, Latin America and the Caribbean – as well as those already living in America. Jazz musicians brought their traditions together (with special emphasis on the blues, church spirituals and ragtime) in a new, universal language. Through the blues, jazz musicians showed that the sorrows common to us all could be overcome with optimism and humor. Through improvisation they celebrated newfound expressive freedom. And through the joyous rhythms of swing, they taught the many different people of New Orleans that they could work together with feeling and style.

Jazz spoke to all Americans and quickly spread upriver to St. Louis, Kansas City, Chicago, New York, and beyond. In the 1920s new technologies like radio, the phonograph and talking motion pictures made it possible for millions to hear jazz across America and around the world. The propulsive rhythms of swing invited these new listeners to tell their stories too. As new generations of musicians filled the music with the depth of their personality, jazz evolved from small groups of early jazz to the brassy big bands of the swing era, the flashy virtuosity of bebop, to laid-back cool jazz, to fusion, free jazz and far beyond.

Jazz has since become a part of every American’s birthright, a timeless symbol of individualism and ingenuity, democracy and inclusiveness. At its very core, this music affirms our belief in community, in love, and in the dignity of human life. And if we let it, jazz can teach us—in ways beyond our imagination—exactly who we are, where we have been, and where we should be going.

‘Jazz is the musical interplay of blues-based melodies, harmonies, rhythms, and textures in the motion of an improvised groove.’

WYNTON MARSALIS
THE FUNDAMENTALS OF JAZZ

A definition of jazz must include reference to the importance of the **blues, swing, and improvisation**. These three ingredients, plus melody, harmony, texture, and rhythm, are the fundamental elements of jazz. No one can deny that jazz is American music. Most people will also agree that jazz is a combination of the music of Europeans, Africans, and other cultures.

The **blues** has many definitions; it is a type of music, a musical form, a harmonic language, an attitude towards playing music, a collection of sounds. Mostly though, the blues is a feeling; whether it’s happy, sad, or somewhere in between, its intention is always the same: to make you feel better, not worse, to cheer you up, not bring you down. Playing the blues is like getting vaccinated. When you get a vaccination for small pox, for example, the doctor gives you small pox in a little dosage. Then your body produces the defenses to fight the disease. Similarly, if you want to get rid of the blues, you play the blues.

The blues was born out of the religious, work, and social music of African Americans in the South during the late 1800s. It has since become the foundation of American popular music, including rhythm and blues, rock ‘n’ roll, country, and all periods and styles of jazz.

**Swing** is the basic rhythmic attitude of jazz. When a whole band is swinging it means everyone is listening to and balancing with one another. Similar to a working Democracy, swing allows us to express our unique personalities while respecting each other in the context of a group.

Swing is expressed as a rhythm with a tension between a top duple rhythm and a bottom triplet rhythm. The bottom rhythm is a steady 4/4—often called “four on the floor”—outlined by the walking bass. This four has extra emphasis on beats 2 and 4 (counted one, TWO, three, FOUR, one, TWO, three FOUR, etc.). The top rhythm is a triplet 6/8 rhythm expressed by the drummer’s ride cymbal (counted one-two-three-four-five-six, one-two-three-four-five-six, etc.). The propulsive tension between these two rhythms, played together in balance, is the foundation of swing.

Swing also refers to a specific jazz style that evolved in the mid-1930s, a period of time known as the Swing Era. It is characterized by large ensembles that play complex arrangements meant for dancing.

**Improvisation** is the spontaneous creation of music. When a musician improvises, he or she invents music at the moment of performance, building on the existing theme and structure of the music. Jazz generally consists of a combination of composed, arranged and improvised elements, though the proportions of one to the other may vary. During a jazz performance, the ensemble plays a chorus or succession of choruses during which an individual player has the opportunity to improvise a solo.

In collective improvisation, two or more members of a group improvise at the same time. Improvisation, both collective and solo, builds a relationship between the members of the ensemble, helping them to “talk” to one another and express their personalities. In other words, improvisation is what makes jazz the music of freedom.
LOUIS ARMSTRONG was born on August 4, 1901 in New Orleans, Louisiana, the birthplace of jazz. Armstrong, known as “Satchmo” or “Pops,” is arguably the most famous and important musician of the twentieth century. With his infectious smile and instantly recognizable gravelly voice, he won the hearts of people everywhere. He wrote two autobiographies, more than a dozen magazine articles, and thousands of letters to friends and fans.

Armstrong played his trumpet with an unmatched level of virtuosity. His exciting, innovative style of playing is imitated by musicians to this day. His mastery of the solo ultimately resulted in a shift in jazz from collective to solo improvisation. Armstrong’s extraordinary technique, command of scales and chords, and rich rhythmic, harmonic, and melodic imagination enabled him to effortlessly compose a musical story as he performed. His vocal lines imitated his unique instrumental phrasing and he developed the jazz vocal style of scat. He popularized jazz by transforming pop standards into jazz classics and using recordings, radio, theater, film, and television to communicate his musical message. Armstrong spread the language of jazz around the world, serving as an international ambassador of swing. His impact on music continues to be felt today.
'If jazz means anything,' **DUKE ELLINGTON** once said, “it is freedom of expression.” No one in the history of jazz expressed himself more freely—or with more variety or swing or sophistication. He was a masterful pianist but his real instrument was the orchestra he led for half a century. More consistently than anyone else in jazz history, Ellington showed how great music could simultaneously be shaped by the composer and created on the spot by the players. Each of his almost 2,000 compositions—love songs and dance tunes, ballet and film scores, musical portraits and tone poems, orchestral suites and choral works and more—was crafted to bring out the best in one or another of the extraordinary individuals who traveled the road with him. Ellington hated what he called “categories,” and refused to conform to anyone else’s notion of what he should be doing. As a result he managed to encompass in his music not only what he once called “Negro feeling put to rhythm and tune” but the rhythm and feeling of his whole country and much of the wider world, as well.

‘If the musicians like what I do,’ **ELLA FITZGERALD** once said, ‘then I feel I’m really singing.’ Discovered at 16 after winning an amateur night contest at the Apollo Theater in Harlem, she first won fame in the late 1930s, performing novelty tunes and romantic ballads with the hard-swinging Chick Webb Orchestra. During the 1940s, she recorded with every kind of backup group and established herself as a master of scat singing, incorporating the fresh harmonies and rhythms of bebop into wordless acrobatic performances that astonished audiences and musicians alike. Her gift of swing, impressive scatting, precise diction, and extraordinary range made her as adept a soloist as any horn player. Then, in the 1950s, she recorded definitive versions of standards by America’s greatest songwriters, from Cole Porter to Duke Ellington. Through it all, she never lost the girlish joy evident on her earliest records, never seemed to sing out of tune, and never failed to swing. Musicians were awed by her musicianship. For her, ‘music is everything,’ her sometime accompanist Jimmy Rowles said. ‘When she walks down the street, she trails notes.’
GOALS • Students learn about the process of improvisation through a familiar song. Students examine the concept of form and explore ways to change melody and rhythm while observing structure. Students also explore the group dynamics of an improvising jazz band.

STUDENT DISCUSSION • To reinforce the concept of form and improvisation, ask students to write down their class schedule for the entire week. Explain that this schedule is like a song form in that it is a set pattern. Then brainstorm as a class about what might happen in a week that could change a schedule. Also discuss what might happen each day within a class period, such as a different lunch, or sitting in a different seat that would allow them to change or improvise on their pattern.

After discussion, have each student take their schedule and improvise two more variations (or choruses) for their weekly schedules.

STUDENT ACTIVITY • IMPROVISING ON A FAMILIAR SONG
Write the lyrics of a familiar song such as ‘Happy Birthday’ on the blackboard. Review the basic melody and rhythm of the song. Then, in groups, have students create their own improvised version of the song vocally or with instruments. Each group might designate one or two students the role of timekeeper/rhythm section. Students might also consider devices like call and response and riffs (short, repeated phrases) in their arrangement, as well as the various vocal inflections.

STUDENT ACTIVITY • IMPROVISING IN A GROUP: LEAD, HANG, FOLLOW
There’s a Latin saying on the U.S. dollar bill, E Pluribus Unum. It means ‘out of many, one,’ and it epitomizes the democratic process of a jazz band. In order to swing, jazz musicians work together for the greater good of the music. They have to balance their own desire to lead and express themselves with those of the rest of the band. Sometimes one soloist will lead while the band follows, then those roles may switch. Other times, a musician will just hang out and wait for the music to welcome them back. In this activity, students will experience leading and following through movement and then on their instruments.

1. Everyone find a partner.
2. Face each other, hands open in front, hands barely touching.
3. Decide who will be the leader and who will be the follower.
4. Let the leader take your hands wherever they lead you.
   Again your hands are not touching.
5. Now switch roles.
6. Next just hang, if you feel like leading, lead or just follow let it flow. TRUST.
7. Reflect. Did you prefer leading, following, or just hanging out?
8. Still in pairs, give each student an Orff or percussion instrument.
   Set up the 2 instruments so that students can play them while facing each other.
9. Demonstrate and practice a swing rhythm using instruments.
10. Decide who will be the leader and who will be the timekeeper, playing a swing pattern.
11. Play, wordlessly allowing the leadership and timekeeper roles to change over time.
12. Reflect: How did students know when to change roles? What musical characteristics emerged over the course of the performance (ex. call and response, dynamics, tempo, registers, textures etc.?)

‘The vocabulary of jazz, the basic building blocks of the music, are metaphors for communication. These haven’t changed very much since the very early days. Call and response means, I speak and you answer. A break... I stop and let you talk or vice versa. Solos... we each get a chance to expound on the subject. Riffs... we agree. Improvisation... what we say and how we say it. And finally, swing, which means coordinating all this communicating with style and good manners.’

jazz and the civil rights era
BIG IDEAS IN JAZZ AND THE CIVIL RIGHTS ERA for Classroom Exploration

FREEDOM • the right to do what you want, to make your own decisions, and express your own opinions.

PROTEST • a statement or action expressing disapproval of or objection to something; also an organized public demonstration expressing strong objection to a policy or course of action.

SEGREGATION • the action of setting someone or something apart from others; also, in US history, the enforced separation of different racial groups.

FREE JAZZ • a style of music pioneered by Ornette Coleman in the late 1950s that abandoned Western harmony and rhythm in favor of greater freedom of self expression.

LYRICS • the words of a song.

SPIRITUAL • a type of religious song developed by African-Americans.

JAZZ AND THE CIVIL RIGHTS ERA PLAYLIST
(notable renditions in italics, most selections available on iTunes)

Mercy, Mercy, Mercy – Cannonball Adderley
Work Song – Cannonball Adderley
Moanin’ – Art Blakey and the Jazz Messengers
The Real Ambassadors – Dave Brubeck with Louis Armstrong
Lonely Woman – Ornette Coleman
A Love Supreme – John Coltrane
Alabama – John Coltrane
Freedom Jazz Dance – Miles Davis
Strange Fruit – Billie Holiday
Freedom is in the Trying – Wynton Marsalis
Compared to What – Les McCann/Eddie Harris
Fables of Faubus – Charles Mingus
Wednesday Night Prayer Meeting – Charles Mingus
Freedom Day – Max Roach, Abbey Lincoln
I Wish I Knew How It Would Feel To Be Free – Nina Simone
Mississippi Goddam – Nina Simone

Spirituals and Civil Rights Anthems:

We Shall Overcome
Lift Ev’ry Voice and Sing
Wade in the Water
This Little Light of Mine
JAZZ AND THE CIVIL RIGHTS ERA

The Civil Rights Era was a time of major social and political change in America. In the 1950s and 60s, acts of protest and civil disobedience highlighted the injustice faced by African Americans and the entire world began to pay attention. Eloquent speeches, protest marches, tragic events, and dramatic conflicts between activists and government authorities marked an era where “freedom” took on a variety of meanings. This turbulent time was reflected in jazz and inspired some of the most passionate and emotional performances and compositions in the history of the music. Musicians like Charles Mingus, Nina Simone, John Coltrane, and others responded to the struggle for civil rights through their music, writing protest songs and inspirational anthems for the era. As the 1960s progressed, some jazz artists continued to create music inspired by the increasingly violent struggle for political freedom; other performers explored radically new forms of expression in search of a purely artistic freedom.

The 1960s began with a sense among many Americans that they were on the threshold of a bright new era. On January 20, 1961, a youthful John F. Kennedy took the presidential oath of office, promising to lead the country toward a ‘new frontier’—one in which Americans would unite to achieve seemingly distant goals. One of these goals included equal rights for African Americans. Less than three years after taking office, Kennedy himself was shot and killed. This act of political violence was followed by similar assassinations: Malcolm X in 1965, Martin Luther King Jr. in 1968, and two months later, Senator Robert F. Kennedy, the late President’s brother. And yet, as the decade progressed, Kennedy’s idealism could be felt across the political, social, and cultural landscape. Segregation was being challenged at lunch counters and schoolhouses across the South. In 1964, President Lyndon Johnson signed the Civil Rights Act, outlawing major forms of discrimination against racial, ethnic, national and religious authorities, and women. Against this political backdrop, a new social phenomenon was growing out of the literary and musical bohemianism of the 1950s. Hippies became the cultural icons of the era; they adopted a lifestyle that emphasized a rejection of conventional politics, religion, and lifestyles and embraced a loose interpretation of non-Western religions and spiritual systems. Though the hippie movement came to be associated almost exclusively with rock music, its sense of freedom and mysticism could be felt in some of the jazz being made around this time.
Spirituality of one sort or another had always been an undercurrent in jazz, but in the 1960s JOHN COLTRANE, one of the most influential and adventurous saxophonists of the era, put forward the belief that music actually had the power to heal, and he brought an almost religious intensity to everything he played. Coltrane explored the harmonic freedom of modal jazz and the tones and textures of various world musics, and he tested the very limits of his instrument—all in search of a more profound musical meaning. Supported by an equally innovative and turbulent rhythm section, Coltrane developed one of the most powerful and explosive styles in jazz, known as ‘sheets of sound,’ for the torrents of notes that streamed from his horn.

Spiritual though he was, Coltrane was hardly detached from the world around him. In 1963, when he learned that the bombing of an African-American church in Birmingham, Alabama, had killed four young girls, he drew on all his expressive resources to create a haunting musical elegy titled simply ‘Alabama.’ This potent combination of seriousness and spirituality became a signature trait of this powerful performer. By 1964, when his landmark album ‘A Love Supreme’ was released, John Coltrane had already achieved the status of idol among many fans and fellow musicians. ‘My music,’ John Coltrane said, ‘is the spiritual expression of what I am—my faith, my knowledge, my being...’

Singer, pianist, composer, and civil rights activist, NINA SIMONE was born in Tryon, North Carolina in 1933. She began playing music at an early age, learning to play piano at the age of 4, and singing in her church’s choir. After finishing high school, Simone won a scholarship to New York City’s Julliard School of Music to train as a classical pianist. She taught piano and worked as an accompanist for other performers while at Julliard, but eventually left school after running out of funds. Turning away from classical music, she started playing American standards, jazz and blues in clubs in the 1950s. Before long, she also started singing along with her music.

Simone’s music defied standard genres. Her classical training showed through, no matter what style of song she played, and she drew from many sources including jazz, gospel, pop and folk. By the mid-1960s, Simone became known as a major voice of the Civil Rights Movement. She wrote “Mississippi Goddam” in response to the 1963 assassination of Medgar Evers and the Birmingham church bombing that killed four young African-American girls. After the assassination of Reverend Martin Luther King, Jr. in 1968, Simone composed “Why? (The King of Love Is Dead).” She also wrote “Young, Gifted and Black,” borrowing the title of a play by Lorraine Hansberry, which became a popular Civil Rights Era anthem.
CLASSROOM ACTIVITY • RESEARCH PROJECT

Have students write down three definitions of the word ‘freedom’ in preparation for discussing improvisation. They can get the definitions from different sources: dictionaries, poems, song lyrics, family, or friends. Have them read their definitions in class and then discuss what freedom means and its relationship to rules in a social setting or in the creation of art, such as dance or painting. Then discuss what freedom can mean when creating music and why it is important.
What happens to a dream deferred?

Does it dry up
like a raisin in the sun?
Or fester like a sore—
And then run?
Does it stink like rotten meat?
Or crust and sugar over—
Like a syrupy sweet?

Maybe it just sags
like a heavy load.

Or does it explode?
BIG IDEAS IN JAZZ
AND THE HARLEM RENAISSANCE
for Classroom Exploration

RENAISSANCE • a movement or period of great activity (as in literature, science, and the arts).

COMMUNITY • an interacting population of various kinds of people in a common location.

CULTURE • the way of life, especially the customs and beliefs of a particular group of people.

SELF-EXPRESSION • the expression of your thoughts or feelings especially through artistic activities (such as painting, writing, dancing, etc.).

CALL AND RESPONSE • a musical conversation in which instrumentalists and/or vocalists answer one another.

RENT PARTY • a party where tenants hire a musician or band to raise money to pay their rent.

STRIDE PIANO • a style of playing piano in which the left hand covers wide distances, playing bass harmony and rhythm at the same time, while the right hand plays melodies and intricate improvisations.

JAZZ AND THE HARLEM RENAISSANCE PLAYLIST
(notable renditions in italics, most selections available on itunes)

On the Sunny Side of the Street — Louis Armstrong
Minnie the Moocher — Cab Calloway
Black and Tan Fantasy — Duke Ellington
Cotton Club Stomp — Duke Ellington
Creole Love Call — Duke Ellington
East St. Louis Toodle-Oo — Duke Ellington
Take the A Train — Duke Ellington
Selections from Gershwin’s Porgy and Bess, including Summertime — Billie Holiday
King Porter Stomp — Jelly Roll Morton / Fletcher Henderson
Careless Love Blues — Bessie Smith
After You’ve Gone — Bessie Smith
St. Louis Blues — Bessie Smith
Ain’t Misbehavin’ — Fats Waller
Honeysuckle Rose — Fats Waller
The Joint is Jumpin’ — Fats Waller
JAZZ AND THE HARLEM RENAISSANCE

WHAT IS THE HARLEM RENAISSANCE?

The Harlem Renaissance was a period of flourishing artistic expression and cultural activity during the 1920s and 1930s. In the decades immediately following World War I, huge numbers of African-Americans migrated to the industrial North from the economically depressed and agrarian South. In cities such as Chicago, Washington, DC, and New York City, the recently migrated sought new opportunities, both economic and artistic. Based in Harlem, New York, one of the largest urban black communities in the North following the Great Migration, the cultural phenomenon saw some of America’s foremost black writers, artists, musicians, and political thinkers emerge at the forefront of American culture. Writers James Weldon Johnson, Langston Hughes, Zora Neale Hurston, and the scholar and civil rights activist W.E.B. DuBois all lived in Harlem, as did many other artists eagerly examining what it meant to be black and American. African-American writers believed that by writing stories, plays, and poems based on their personal experiences, they could unite black Americans and change people’s attitudes about racism. It was also home to the National Association for the Advancement of Colored People (NAACP), the Urban League, and Marcus Garvey’s Universal Negro Improvement Association. ‘Harlem, in our minds,’ Duke Ellington remembered, had ‘the world’s most glamorous atmosphere. We had to go there.’

One of the most lasting influences that the Harlem Renaissance had on jazz was the Harlem stride style. The Harlem stride style, or “stride,” is a way of playing the piano that imitates the sound of an entire band. The left hand “strides” or alternates between the bass notes on low section of the piano and chords around the middle of the keyboard, keeping a steady rhythmic beat. The right hand plays swinging and often complicated melodies, imitating horn parts. This unique style was popular at rent parties in Harlem, where tenants would hire a musician or band to play and pass the hat to raise money to pay their rent. Many notable jazz musicians were associated with rent parties, including pianists James P. Johnson, Willie “the Lion” Smith, and Fats Waller. Rent parties were also a frequent location of “cutting contests,” where pianists took turns at the piano, attempting to out-do each other with their virtuoso stride styles.

KEY FIGURES

DUKE ELLINGTON was born in Washington, D.C. on April 29, 1899. His parents both played piano and they encouraged their son to study music at a very early age. In 1923, Duke moved to New York, where he joined the cultural revolution known as the Harlem Renaissance. Composer Will Marion Cook advised young Ellington, ‘First…find the logical way, and when you find it, avoid it and let your inner self break through and guide you. Don’t try to be anybody else but yourself.’ It was a lesson Duke would carry throughout his career.

Zora Neale Hurston was an American folklorist, anthropologist and author. She is best known for her novel Their Eyes Were Watching God.

Langston Hughes was an American poet, social activist, novelist, playwright, and columnist. He was one of the earliest innovators of the art-form “jazz poetry.”

Duke Ellington and the Washingtonians
Duke and his group, The Washingtonians, found a steady job at the Kentucky Club near Times Square. Though he was just beginning his career as a composer, his five-piece band quickly earned attention for its fresh and unusual sound, highlighted by the startling growls of trumpeter Bubber Miley. Their growing reputation eventually earned the band a job at Harlem’s prestigious Cotton Club, where they would stay from 1927 to 1931. The band, a musical laboratory of sorts, continued to expand in size, offering its leader ever-varied tone colors with which to experiment. Armed with a growing arsenal of sounds and textures, Ellington began to broaden the scope of his work, experimenting with extended song forms, unconventional harmonies, and orchestrations.

Over the next five decades, Ellington embraced the scope of American music like no one else. He synthesized ragtime, the minstrel song, Tin Pan Alley, the blues, and American appropriations of the European music tradition, creating a consistent and recognizable style.

THOMAS ‘FATS’ WALLER had such a magnetic personality and was such a consummate showman, one younger musician remembered, that ‘you could never be sad in his presence.’ Waller’s bubbling stage persona—leering and lampooning the tunes he sang and played, shouting to urge his men on—often hid the master he really was. After Duke Ellington, Waller was the most prolific and successful songwriter to emerge from the world of jazz. Songs like ‘Ain’t Misbehavin’; ‘Honeysuckle Rose,’ and ‘Keepin’ Out of Mischief Now’ (all written with lyricist Andy Razaf) became American standards and helped make him nearly as celebrated in his lifetime as his friend Louis Armstrong.

He was also the first jazz musician to record on the organ, but his most lasting impact was as a pianist. Building upon the Harlem stride he learned from his mentor, James P. Johnson, Waller developed his own irresistibly swinging style. His tireless left hand set the driving pace while his right served up delicate figures that continue to dazzle pianists. Jimmy Rowles marveled that Waller seemed able to ‘think in two directions.’ ‘Fats,’ said Art Tatum, ‘that’s where I come from.’ And Mary Lou Williams urged students hoping to learn how to play jazz to ‘go back to Fats Waller. That’s the metronome.’

‘BESSIE SMITH was a fabulous deal to watch,’ the banjoist Danny Barker remembered. ‘She was a large pretty woman and she dominated the stage. You didn’t turn your head when she went on. You just watched Bessie.’ Her stage presence may have mesmerized audiences but it was her huge, confident voice, captured on records and capable of conveying every human emotion from grief to joy without a hint of sentimentality or self-pity, that made her the acknowledged Empress of the Blues.

She began her show business career in 1912 as a chorus girl with a touring tent show, Ma Rainey’s Rabbits Foot Minstrels. She was not the first singer to record the blues. That honor went to Mamie Smith (no relation) who set off the blues craze in 1920. But from the time she began to record in 1923, Bessie Smith out-sang and out-sold all her rivals. Great musicians accompanied her—Louis Armstrong, Sidney Bechet, James P. Johnson and more—but she was always the star, traveling in her own private railroad car, drawing huge crowds wherever African Americans lived, north as well as south, and admired by growing numbers of whites, as well.
CLASSROOM ACTIVITY • THE BLUES

GOALS • Students unleash their imagination and explore the emotional power and lasting influence of the blues. Students will also create their own blues-inspired pieces in groups.

STUDENT ACTIVITY • THE SOUND OF BLUES-EXPRESSING & SHARING

1. Through interactive questions and answers, discuss the idea of universal human emotions, and how music, a universal language, has traditionally been used to express and share these feelings.

2. Have students imagine, and/or write about an experience that caused them sadness or pain.

3. Form a circle and one at a time, have each student make a vocal sound that represents the feeling of the sad or painful emotion. Have the rest of the class repeat the sound together.

4. Divide the group in half, one half clapping on beats 2 and 4. The other half will experiment ‘riffing’ their blues sounds with the beat.

5. Divide into teams of 4 or 5 and have each group create a short piece using their original sounds, integrating the swing rhythm, call and response, improvisation, and class percussion instruments, if possible.

6. Perform the blues-inspired pieces for one another. Discuss if and how expressing and sharing feelings through sound and music can transform a feeling of pain or sadness into one of joy and humor.

'It’s important to understand the difference between having the blues and playing the blues. Having the blues is sad. But playing the blues is like taking medicine. Actually it’s like being vaccinated. If you get a vaccination for small pox, for example, the doctor actually gives you small pox in a little dosage. And then your body produces the defenses to fight the disease. That’s what the blues is. If you want to get rid of the blues, you play the blues.’

WYNTON MARSALIS, Jazz for Young People Curriculum
RESOURCES

VIDEOS/DVDS

Jazz: A Film by Ken Burns (2000) - A 10-part series featuring interviews with Wynton Marsalis and covering an expansive history of jazz by the acclaimed documentarian of the civil war, baseball, and World War II.

**SELECTED RECORDINGS**

This abbreviated compilation of recordings aims to serve as an introduction to jazz. It is our hope that the recordings from this list will provide for hours of listening enjoyment and a continued exploration of jazz. The multiple-CD sets listed represent one or more periods of an artist’s career. While they cost more, these collections provide a significantly broader artistic view and are generally a better investment.

**Louis Armstrong** – The Complete Hot Five and Hot Seven Box Set (4-CD set), Columbia/Legacy 65527, 1925-29; Louis Armstrong: The Big Band Recordings 1930-32 (2-CD set), JSP 3401.

**Sidney Bechet** – The Best of Sidney Bechet, Blue Note Records CDP 7243 828891 2 0, 1939-53.

**Bix Beiderbecke** – Riverboat Shuffle, Naxos Jazz 120584, 1924-29.

**Art Blakey & The Jazz Messengers** – Moanin’, Blue Note Records 95324, 1958.

**Miles Davis** – Kind of Blue, Columbia Records CK 64935, 1959; The Best of Miles Davis and Gil Evans, Legacy 67425, 1957-88.

**Duke Ellington** – Ellington at Newport, 1956 (Complete), Columbia 64952; The Blanton-Webster Band (5-CD set), RCA/Bluebird Records 5659-2-88, 1940-42.

**Bill Evans** – Portrait in Jazz, Riverside 1162, 1959.

**Gil Evans** – Miles Ahead (under Miles Davis), Columbia 65339, 1957.

**Erroll Garner** – Concert by the Sea, Columbia 40589, 1955.
